The 2024-2025 364 Day Calendar

Format: Monthly

Version: March 20th Equinox

>NOTE: March 19 Equinox is extended to
March 20 due to extra day for leap year

>NOTE: Adjust Gregorian weekdays to match Gregorian dates (i.e. change Wed. to Thurs., Thurs. to Fri., Sat. to Sun., etc.)

Calendar Outline, Rules, Concepts, & Commentary:

The calendar year is 364 Days as stated five times in 1st Enoch: 72:37, 74:10, 74:12, 81:7, 81:11, twice in Jubilees: 6:32, 6:38, & twice in the Dead Sea Scrolls: 4Q3943-71 i, 11Q5 xxvii.

The 364 Day Calendar Year ≠ 365.24 Day Solar Cycle. They are different. A calendar year is not a solar cycle, there is a difference of one day every solar cycle and a difference of two days every 4th solar cycle. And to understand how the calendar works we need to identify what day is the 365th Day of the solar cycle that is not part of the 364 Day calendar year. This understanding has been hidden by David in Psalm 19.

Jubilees 6:32-38 is an explicit that the calendar is 364 Days and **NOT** a 354 Day Lunar Calendar and those that use a lunar calendar will be in ERROR for Feast Days and Sabbaths and Months, and Years. To be in error of the Sabbath Day, means that the days of the week are calibrated by the sun. This is not a foreign concept because the Ancient Babylonian Calendar the days of the week were calibrated every new moon cycle every 29 or 30 days. There was no continuous unbroken 7 day cycle. Jubilees 2:9 is evidence that the great sign of the sun is to be used for calibrating the days of the week.

Jubilees 2:9 "And Elohim appointed the sun to be a great sign ON the earth for days and for sabbaths and for months and for feasts and for years and for sabbaths of years and for jubilees and for all seasons of the years." This verse means that the great sign of the sun calibrates / re-calibrates / resets the calendar year ever year. Thus the calendar is calibrated by the great sign of the sun on the earth.

The Great Sign of the sun is the Spring Equinox. The sun's casted shadow on the Spring Equinox is the Great Sign ON the earth and it calibrates everything mentioned in Jubilees 2:9. The Spring Equinox re-calibrates / resets the calendar year and in doing so it establishes the days of the week for the new coming year. So we hear on earth use the great sign of the sun every year to sync our days up to the days and calendar in heaven thus it is a Solar Sabbath / Heavenly Sabbath. This means that YHWH Elohim's calendar does not use the false Gregorian days of the week but rather the sun on the Spring Equinox establishes the days of the week for the new year.

The concept of establishing the days of the week is not uncommon as the Ancient Babylonian Lunar Calendar would reestablish the Days of the Week every New Moon that occurred every 29 or 30 days. The Modern "Lunar Sabbath" Calendar that is in Hebrew Root circles is the same calendar as the Ancient Babylonian Lunar Calendar, just a different name.

The Key of David: Hidden in Psalm 19 David placed the key to understand 364 Day calendar. The door of the tabernacle of Moses was orientated due east, the temple that Solomon built was designed by King David was also aligned due east, this means that the tent / tabernacle of David was also due east. There is not much written on the text / tabernacle of David but I found a verse Psalm 19:5. Because the tabernacles and temple were aligned due east this means on the day of the Spring Equinox the sun would shine directly into the tabernacle, tent, and temple. Thus per Psalm 19:4-6 the sun goes into his canopy/chamber on the day after the 364 Day race which is the day of the Spring Equinox and the day after the Spring Equinox the sun comes out of his canopy/chamber to begin to run his 364 Day race, which is Day #1 of 364. By process of elimination on a 365 Day Solar Cycle the day the sun shines due west into his canopy/temple which is facing due east is the day not apart of the 364 Day calendar! It is that simple to understand!

New Month = Rosh Chodesh. Rosh in Hebrew means "head." Chodesh in Hebrew means "renewing cycle." So the renewing cycle (month) are 30 days intervals. The calendar has 12 months of 30 Days each plus 4 intercalary days (which are 1 day at the end of the every three months, so months 3, 6, 9, and 12 have as if 31 days) for a total of 364 Days.

In 1st Enoch chapter 72, it documents the sun rising and setting in portals along the horizons for the following days: 30, 30, 31, 30, 30, 31, 30, 30, 31, 30, 30, & 31 for a total of 364 Days. Each period corresponds with a month but a major problem I noticed is that the sun's movements does not exactly follow the portals of Enoch 72. This is a problem with the Book of the Heavenly Luminaries. It does not affect the calendar year being 364 days.

Even though the sun does not move as said in the portals of Enoch 7 the months of days of 30, 30, 31, 30, 30, 31, 30, 30, 31, 30, 30, & 31 for a total of 364 Days is supported by the dates of the Pentecost First Fruits of New Wine and New Oil recorded in the Dead Sea Scrolls. The Dates of the festivals of New Wine (tirosh H8492) & New Oil (yistar H3323) which each occur on the 1st Day of the week proves there was a 31st Day in the 3rd Month occurring on the 3rd Day of the week.

The day after the Spring Equinox is the 1st Day of the 1st Month and resets to the 4th Day of the Week, the day Alahym made the sun, moon, and stars, and "time began."

We know the 1st Day of the 1st Month is the 4th Day of the Week because in Dead Sea Scroll 4Q394 1-2 they "pegged" / dated the date of Shavuot to the 15th Day of the 3rd Month and we know Shavuot is always on the 1st Day of the Week, so all we have to do is count backwards from the 15th Day of the 3rd Month which is the first day of the week to the 1st Day of the 1st Month and it is the 4th Day of the Week.

The Dead Sea Scrolls also "pegs" the date of First Fruits of Barley Wave Sheaf Festival to the 26th Day of the 1st Month in scroll 4Q325. This means that the Barley Festival does not take place during the week of Unleavened Bread but rather on the first day of the week after the Sabbath after the Festival of Unleavened Bread. And also like Shavuot, counting backwards from the First fruits of the Barley Wave Sheaf Festival to the 1st Day of the 1st Month, it is the 4th Day of the Week.

This means every Festival (and date) is on the same day of the week every year and in the same position of the sun's course relative to the Spring Equinox every year. Example: no Passover, or any other Festivals take place on the 7th Day Sabbath as the Sabbath is its own festival day as per Leviticus 23:3. Passover will always be on the night of the 14th Day after the Spring Equinox which is always the 3rd day of the week.

The "24 Hour" Day begins at Sunrise **NOT** Sunset per YHWH Alahym's own words in Jeremiah 33:14-26. He says in order His covenant is with the Day First and the Night second in that order repeating Himself three times in the passage and this covenant with the day first and the night second is tied to His covenant with David!

Yom Kippur starts on the evening (sunset) of the 9th to the evening (sunset) of the 10th Day of the 7th Month per Leviticus 23:32, this is only logical with a Sunrise start day. The mourning & fasting instruction in Leviticus 23 for Yom Kippur with the Fast / Mourning beginning at Sunset of the previous day is the fasting template precedent also for the fast days of the 4th, 5th, and 10th months.

According to Job 3:1-26, Job (who is pre-flood) cursed the day he was born and had it removed from the reckoning of the year. I hypothesize that Job was born on the Spring Equinox and this reason the calendar is 364 Days and **NOT** a complete solar cycle of 365.24 Days. Job also cursed the night he was conceived was conceived. If we was born on the Spring Equinox he might have been conceived on the night of the Summer Solstice, a difference of 274 days which is the length of a human gestation! The night on the Summer solstice is the shortest night of the year and is approximately 0.24 of the day. So together, the full day + night period of Job 3 is 1.24 days which is the difference between a 364 Day calendar year and a 365.24 day solar cycle!

There is only one 364 Day Calendar of Months #1-12 but there are two years, an ecclesiastical year of Months #1-12 and the agricultural / Judah's civil year of months #7-6. The Calendars run concurrently but offset by 6 months. The Shmita / Jubilee Cycle is on the agricultural year. The Kings of Judah ascended the throne on Rosh Hashanah of their civil calendar. I have a two part video series explaining this from the Torah, be sure to watch it!

The Book of the Heavenly Luminaries which is chapters 72-82 in the Book of Enoch is the only Book of the of five books of 1st Enoch that Messiah Yeshua did not quote from nor was any fragments found among the Dead Sea scrolls. Chapter 82, which is the last chapter of the Book of the Heavenly Luminaries is missing the last half of chapter. The procession of the equinoxes debunks the leaders of the stars of Enoch 82 and I don't see how Enoch 82 is authentic text. Again, This does not detract from the calendar year being 364 Days as the sun goes into his tabernacle after the 364 day race is complete and comes out his tabernacle the day after the Spring Equinox to run his 364 day race per Psalm 19.

Calendar Key:

-  Spring Equinox, the Day the sun is in his tabernacle per Psalm 19:4-6, the Great Sign on the Earth per Jubilees 2:9
-  New Months / Rosh Chodeshim
-  Sabbaths
-  The Feasts of YHWH of Leviticus 23
-  Fasts of the 4th, 5th, 7th (Yom Kippur), & 10th Months of Zechariah 8:19
-  The additional Feast Days of The Temple Scroll and Calendrical Scrolls of the Dead Sea Scrolls
-  "31st Day" / Intercalary Day
-  Summer & Winter Solstice & Fall Equinox
